## Research Interests and Scientific Results

---

I am currently a final-year PhD student at the University of Rome Tor Vergata. My research interests are in the area of distributed computing systems, with particular emphasis on performance modeling and optimization of distributed applications. As a PhD student I have been mainly investigating mechanisms and policies for run-time deployment adaptation of distributed data stream processing applications.

Since 2017, I have co-authored 3 papers published in international journals and 6 papers published in international conference and workshop proceedings. As at December 2020, Google Scholar reports 95 citations of my papers, with a h-index equal to 6; Scopus reports 81 citations, with a h-index equal to 5.
